

# BIOPAQ®ICX

The BIOPAQ®ICX is an excellent solution for your wastewater treatment system (new or existing) as it was developed to tackle frequent operational issues like high energy consumption, unstable performance, loss of biomass and accumulation of calcified biomass. The modular design of the BIOPAQ®ICX reactor enables the reuse of existing assets like tanks and peripheral equipment, ensuring savings on investment costs.

## Characteristics of the BIOPAQ®ICX

- Modular design which fits in a wide range of tank sizes
- High volumetric loading rates are possible due to high overall biomass concentration and biomass level in the reactor
- Due to completely closed design no odour emissions: suitable for urban areas
- Excellent 2-stage biomass retention, so no wash-out of biomass
- Cleaning nozzles in the settling unit (CIP): low maintenance requirements and no clogging risk
- Capable of handling high calcium levels due to proper mixing conditions in the reactor

### BIOPAQ®ICX, how it works

- 1** Wastewater enters the anaerobic digestion zone through the feeding/distribution system
- 2** Organic components are converted into methane (biogas), which leaves the reactor via the top of the reactor (6)
- 3** After the biological process is completed, the treated wastewater enters the degassing unit
- 4** In the lower unit the biomass is separated from the treated wastewater
- 5** Effluent leaves the reactor
- 6** Biogas leaves the reactor

- Superior biomass retention
- 2-stage separator design

- High quality reactor internals
- In-house manufacturing and quality control

- Proven design influent distribution system
- Ideal for mixing of the granular biomass bed and harvesting of the surplus biomass

## Paques: leading in biological wastewater and gas treatment

Paques has over 30 years experience in helping industries and municipalities to reduce their water and carbon footprints and reclaim valuable resources. The cost-effective effluent purification systems produce energy from wastewater, whilst purifying the water and facilitating water reuse.

Since 1980, Paques realised more than 2000 references worldwide. Besides the headquarters in The Netherlands, Paques has subsidiaries and/ or production locations in China, Brazil, North America and India. In many other countries, the company is represented by licensed partners. This ensures local presence and the best service for clients worldwide.
